- 10. The 23rd Tank Regiment is equipped with T-34 tanks, some of which mount 122mm guns and others mounting 85's. It also has JSU-152's and SU-100's. Trucks include 48 US trucks and 18 ZIS-5's. ZIS-151's are not used by Soviet troops in Germany, but would be in the event of combat. No armored personnel carriers are used. The Regiment has 100% T/E equipment. Many tanks and trucks are ordinarily kept in dead storage, but these vehicles and weapons do accompany the Regiment to Koenigsbruck.
- 11. The 9th Tank Division includes eight regiments of all types. One of these is an artillery regiment.
- 12. When the 23rd Tank Regiment moves to Koenigsbruck, it maintains a three-day supply of rations on trucks, plus an undetermined amount of ammunition. It is not necessary to return to winter kasernes for any supplies when the regiment is in the training area. Some supplies come from the USSR and others are procured in Germany.
